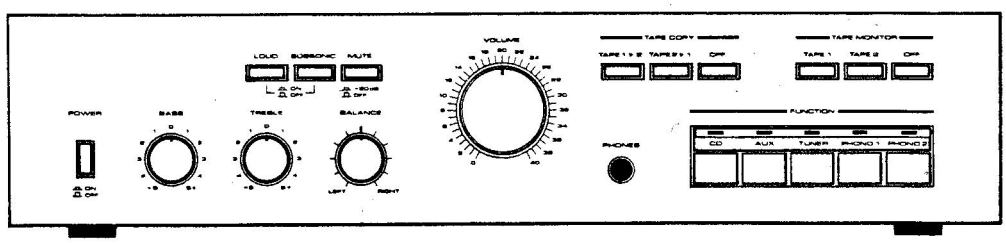
MODELS

LA1000 STEREO PREAMPLIFIER



LA 1000 STEREO PREAMPLIFIER

SPECIFICATIONS

Amplifier Section

Continous Max. Output Voltage is 8 Volts Per Channel, Min.. at 47 Kohms from 20Hz to 20kHz with no more than 0.02% totaharmonic distortion.

- Input (Sensitivity/Impedance)
  Phono 1, 2 ..... 2.5mV/47KΩ
  Tuner, Aux,CD, Tape 1, 2 Play 150mV/47KΩ
- Phono Overload Level (T.H.D. 0.05%, 1kHz)
  ..... 280mV
- Output (Level/Impedance)
  Tape 1, 2 Rec 150mV/2.2KΩ
- Frequency Response
  Phono 1, 2 (RIAA Equalization)
  ..... 20Hz to 20kHz ±0.5dB
  Tuner, Aux, CD, Tape 1, 2 Play.... 20Hz to 80kHz ±3dB
- Tone Control
  Bass (100Hz)..... ±10dB
  Treble (10kHz)..... ±10dB
- Loudness Control (Volume Control set at −40dB Position)..... +6dB (100Hz), +4dB (10kHz)
- Subsonic Filter 15Hz (6dB/Oct)
- Muting ..... −20dB
- Hum & Noise (IHF,Short-Circuited, A Network)
  Phono 1, 2 ..... 88dB
  Tuner, Aux, CD, Tape 1, 2 Play 100dB

Miscellaneous

Power Requirements..... AC220V, 50Hz
Power Consumption..... 16W
Dimensions..... 420(W) × 88(H) × 330(D)mm
Weight (without package)..... 4.6kg

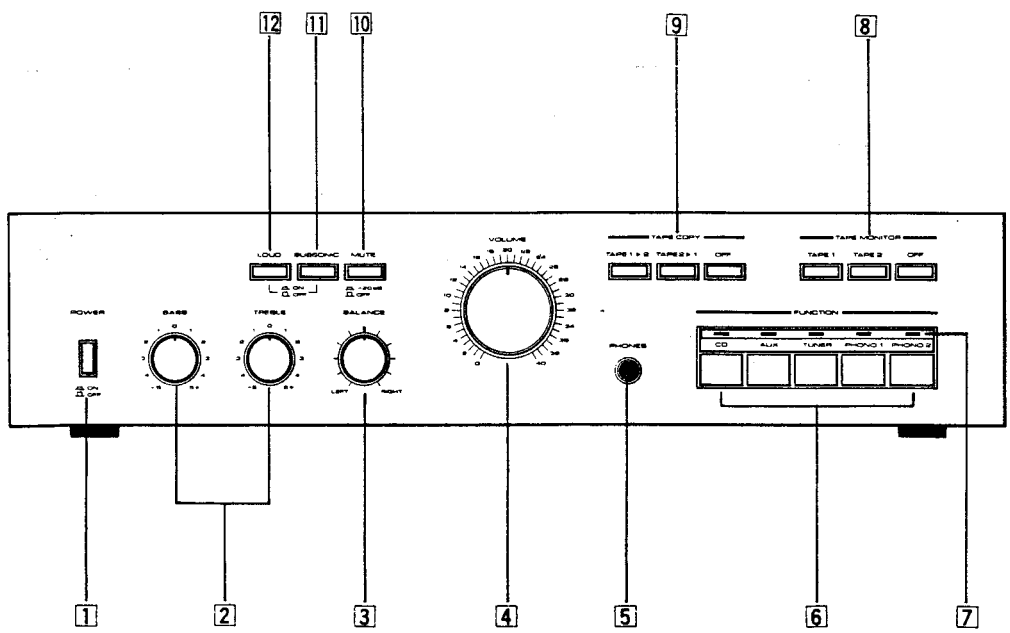
Furnished Parts

Operating Instructions 1
Connection Cord 1

Note:

- Specifications and design subject to possible modification without notice due to improvements.
- Measured pursuant to the Federal Trade Commissions Trade Regulation rule on Power Claims for Amplifier.

FRONT PANNEL FEATURES



.1 POWER SWITCH

Press to on position to turn on the pre-amplifier. Upon power up, a muting circuit presents a short delay in order to suppress the sometimes annoying sound present at switch-on.

2. BASS AND TREBLE CONTROLS

Use these controls to adjust the bass and the treble. If you turn the bass control clockwise from its center position, you will be able to emphasize the sound in the low-frequency range. Conversely, turning the bass control counter clockwise from the center position, you will attenuate the sound.

Use the treble control to adjust the sound in the high-frequency range in the same manner.

3. BALANCE CONTROL

Use this control to balance the volume of the left and right channels.

4. VOLUME CONTROL

Use this control to adjust the output level to the speakers and headphones. Turn it clock wise to increase the output level. No sound will be heard if you set it to "0".

5. HEADPHONE JACK

Plug the headphones into this jack when you want to listen through your stereo headphones.

Besure to turn down the volume level before plugging in the headphones. Turn up the volume level to a comfortable listening level once the headphones are adjusted.

6. FUNCTION SELECTOR

Use this selector to select the program source. When set, the function indicator above the panel corresponding to the position of the function selector will light up.

CD : Select when you wish to listen to a Compact Disc Player.

AUX : Select when listening to a program source which is conected to the AUX jacks.

TUNER : Select when listening to radio broadcasts from the tuner.

PHONO 1, 2: Select either Phono 1 or Phono 2 when playing a record on the corresponding turntable.

7. FUNCTION INDICATORS

The CD, AUX, TUNER, PHONO 1, 2 function indicators light up in accordance with the position of the function selector.

8. TAPE MONITOR SWITCH

Use these buttons to select the program source which is being reproduced.

TAPE 1 : Select to monitor a recording or a tape being played back on the tape deck which is connected to the TAPE 1 jacks.

TAPE 2 : Select to monitor a recording or a tape being played back on the tape deck which is connected to the TAPE 2 jacks.

OFF : Select whenever you are not playing back a tape or monitoring a recording.

9. TAPE COPY SWITCH

Use these switches when using two tape decks to copy recorded tapes or edit tapes. This switch is otherwise kept at the OFF position.

TAPE 1 ▶ 2: When playing back the tape on a deck connected to the TAPE 1 jacks and recording (copying) on a deck connected to the TAPE 2 jacks.

TAPE 2 ▶ 1: When playing back the tape on a deck connected to the TAPE 2 jacks and recording (copying) on a deck connected to the TAPE 1 jacks.

OFF: Set to this position when not copying.

10. MUTE SWITCH

Set this switch to −20dB to attenuate the audio output indicated by the volume control by 20dB.

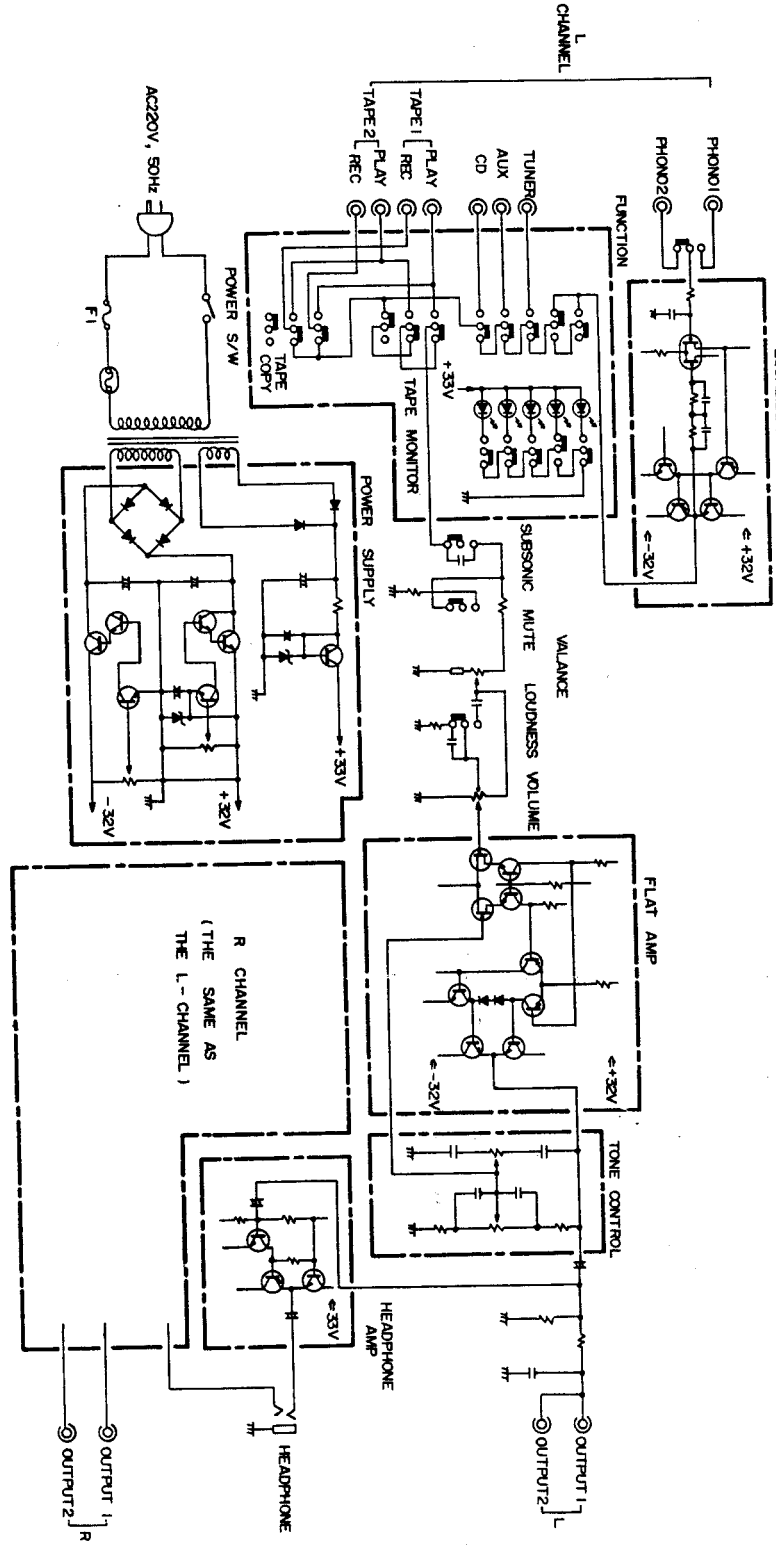
11. SUBSONIC FILTER SWITCH

When depressed, the subsonic filter (15Hz cut-off) reduces turntable rumble, record warp noise and other ultra low frequency noise.

12. LOUDNESS SWITCH

This compensates for human hearing characteristics by boosting the bass and treble response at low volume listening levels to achieve a more pleasing tone balance.

BLOCK DIAGRAM



EXPLODED VIEW PARTS LIST

Note:
- Parts without part number cannot be supplied.
- The ⚠ mark found on some component parts indicates the importance of the safety factor of the part. Therefore, when replacing, be sure to use parts of identical designation.
- For your Parts Stock Control, the fast moving items are indicated with the marks * * and * .
  * * GENERALLY MOVES FASTER THAN *
  This classification shall be adjusted by each distributor because it depends on model number, temperature, himidity, etc.
- Patts marked by "⊙" are not always kept in stock. Their delivery time may be longer than usual or they may be unavailable.

Parts List of Exploded View

	1. NAC-121	Volume Knob
	2. NAC-120	Rotary Knob
	3. NNB-122	Front Panel
	4. NNW-776	Push Escutcheon
	5. NNW-774	Function Knob "A"
	6. NNW-777	Power Escutcheon
	7. NNW-711	Power Knob
	8. NLA-156	Guide Nut
	9. NNA-264	Panel Stay
⚠	10. NSG-108-A	Power S/W
	11. NNA-175	Side Stay
	12. NNA-177	Canter Frame
	13. NNW-676	PCB Holder
	14. NNF-226	Trans Frame
⚠	* 15. NTT-146	Power Trans
	16. NCC-101	Rear Panel
	17. 406-000-009-009	Strain Relief Bushing
⚠	18. NDG-022	AC Power Cord
	19. NNE-035	Bonnet Case
	20. NKE-005	Ground Terminal
	21. NWM-137	Main PCB Ass'y
	22. NWM-115	Control PCB Ass'y
	23. NNW-775	Function Knob "B"
	24. NNW-1074	LED Escutcheon
	25. NND-032	Bottom Plate
	26. NNW-050	Foot

ADJUSTMENTS

DC Voltage Control

1. Adjust VR401 for 32V (to within ±0.1V) between terminal No. 3 and ground.
2. Adjust VR402 for −32V (to within ±0.1V) between terminal No. 4 and ground.

PHONO DC Balance

1. Adjust VR101 (L) for 0V (to within ±0.1V) between terminal No. 1 and ground.
2. Adjust VR102 (R) for 0V (to within ±0.1V) between terminal No. 2 and ground.

ELECTRICAL PARTS LIST

Notes:

- When ordering resistors, first convert resistance values into code form as shown in the following examples.

Ex. 1. When there are 2 effective digits (any digit apart from 0). such as 560 ohm and 47k ohm (tolerance is shown by J = 5%, and K = 10%).

560Ω = 56 × 10^1 → 561 ..... RD1/4PS561J
47 kΩ = 47 × 10^3 → 473 ..... RD1/4PS473J
0.5Ω → 0R5 ..... RNZHOR5K
1Ω → 010 ..... RS1P010K

Ex. 2. When there are 3 effective digits (such as in high-precision metal film resistors).

5.62kΩ = 562 × 10^1 → 5621 ..... RN1/4SR5621K

- The ⚠ mark found on some component parts indicates the importance of the safety factor of the part. Therefore, when replacing, be sure to use parts of identical designation.
- For your Parts Stock Control, the fast moving items are indicated with the marks ** and *.
  **GENERALLY MOVES FASTER THAN *
  This classification shall be adjusted by each distributor because it depends it depends on model number, temperature, humidity, etc.
- Parts marked by "⊙" are not always kept in stock. Their delivery time may be longer than usual of they may be unavailable.
